Conquering Mt. Kilimanjaro is considered an accomplishment of a Lifetime.

There is no "best" Kilimanjaro route! It all depends on you.

Among the differences between these routes:

- The routes have starting points located on multiple sides of the mountain.
- The routes vary distance and accordingly so do the completion times.
- There are relatively easy trails, difficult routes, and even dangerous ones.
- Certain routes are favorable for altitude acclimatization due to their route profile.
- There are routes that are better when climbing during the rainy season.
- One route (Marangu Route) offers hut accommodations while the rest are camping routes.
